

Advanced Solutions: **Comper IT can help you build an** **IT strategy for your business** **without having to hire a CTO.**

Information Technology (IT) is a vast field. It encompasses many aspects including network infrastructure, software applications, data security, remote access, and disaster recovery.

You should only entrust your business' most important processes and resources to a worthy and recognized partner with the right experience and approach:

Comper IT: Unequaled Experience

We can help to devise an IT strategy for your business; we work with you to stabilize and secure your current environment, and plan the future phases, all without the burden and cost of full-time IT people. Comper IT's expertise can help in many areas including:

- **Infrastructure Design**
- **Network Audits**
- **Project Management**
- **Disaster Recovery Planning**

Combined with our world-class customer service, Comper IT's maintenance program for your network includes all critical operations:

- 24/7 Network Monitoring
- Help Desk Support
- Backup Solutions
- Database Administration
- Monitoring Security Threats
- Remote Access Solutions
- Wireless Security

A Proven Approach

In the initial planning stage, we learn and understand your business goals and budget. We then design and implement a network tailored to your operational requirements, including:

- Cabling
 - Switches, hubs, servers, mail servers
 - Peripherals
 - Security groups, profiles, access rights
 - Anti-virus protection and virus cleanup
 - Remote connectivity and access, virtual private networks (VPN)
 - Mailbox configuration (size limits, organization, security policies)
-

Infrastructure Design

Comper IT can design, implement, and maintain scalable networks and architecture applications tailored to your environment and processes

- Expertise in Windows Server 2003 and Windows Small Business Server 2003.
- We support multiple platforms - Hardware, software, peripherals, security and maintenance - with a focus on Microsoft technology to provide a complete solution for your business.

Project Management

Certified Project Managers manage the resources involved including people, vendors, budgets and scheduling. We oversee your entire project including:

1. Needs analysis
2. Budget determination
3. Product evaluation
4. Scheduling
5. Implementation
6. Maintenance & Support

Disaster Recovery Planning

We develop a plan of action to keep your business running in case of disaster.

Two-Hour Free Appraisal* - We can assess your plan or provide general information to get you started in creating a plan.

No hidden fees. If you decide to hire us to create a more tailor-made plan, (you're under no obligation) we'll work on it immediately!

Protect your business with our DR Plan solution!

IT Security

Information Security is an essential part of your digital infrastructure. Comper IT focuses on providing information technology security services to corporate clients in a broad range of industries.

Comper IT works with clients to identify threats and secure information assets and is dedicated to providing a complete range of security assessment, risk mitigation, data backup and contingency planning solutions.

- Our Security Integration Services address security issues via design and integration of customized security solutions for client network infrastructure, protecting client's vital information and assets.
- Comper IT's holistic approach to security includes an examination of physical controls, policy review and an evaluation from the network perimeter to the application code.

Firewall Deployment and Management

Our Firewall Management Service can be a critical factor in the security of your network infrastructure; it enables you to implement best-of-breed systems and manage them cost effectively.

- Our partnerships with Cisco, Sonicwall, and Juniper Networks provide a wide range of Firewall options to fit your security and budgetary requirements.
- Virtual Private Networks, Secure Network Architecture, Content Filtering, Encryption, and Traffic Monitoring are all services that are available for your network security needs.

Malware Protection

Protection Management against external threats has become a vital component of any comprehensive security policy.

- Comper IT provides a full range of protection against Virus and Malware attacks, as well as Spam management.
- Comper IT is an authorized reseller of Symantec, McAfee, Microsoft, CA, SendEo, and Kaspersky products,

Vulnerability Scanning

Security vulnerabilities are discovered every day.

- Comper IT provides vulnerability scanning to proactively find security holes, misconfigurations, changes or weaknesses in your network.
- Early identification of security flaws allows your company to react quickly and appropriately to close security holes and help prevent attacks and data compromises.

Backup Management

Protect your operations from potentially crippling data loss and operational disruptions.

- Comper IT ensures proper backup policy and business continuity planning
- We implement disaster recovery planning, on-line data replication, and off-site backup management solutions to safeguard the entire life cycle of your business critical data.

Policies & Procedures Documentation

Comper IT creates applied working documents designed to deliver secure business operations.

- Comper IT offers corporate security policy, business continuity/disaster recovery plans, incidence response plans and operational guidelines custom tailored to a client's operation.
- Policies are developed with a combination of staff interviews, client documentation and industry and "best practice" documentation.
