

Email Solutions: Mail, Migration and Messaging

Today, with mainstream mobile communication and remote connectivity, email and other messaging solutions are critical to the communications flow within and between organizations. Thus, a downed email server can be the difference between closing the deal and losing the deal to a competitor.

You should only entrust your business' most important processes and resources to a worthy and recognized partner with the right experience and approach:

Comper IT: Unequaled Experience

- Comper IT has been migrating, deploying and supporting Microsoft Exchange for over 10 years.
- As a [Microsoft Certified Partner](#), Comper IT has achieved the Information Worker in Messaging and Collaboration competency, which recognizes those partners with the highest expertise in Exchange.
- We have installed and supported a collective user base of over 30,000 users.
- Our knowledgeable consultants are Microsoft and Novell certified, with many years of experience providing maintenance, problem resolution, and diagnostic services.

A Proven Approach

We have learned that close client interaction is the key to developing and executing a successful, cost-effective migration plan.

- We work closely with our clients' staff to analyze current network infrastructure and ensure that our custom design best suits your particular communication needs.
- All migration plans take into account the client's strategic plans and are created to minimize downtime and maximize your company's hardware investment.
- We test and fine-tune the final design, and train all users on the new system prior to migration.

Messaging systems bring customers and team members closer by augmenting network communication with real-time discussions using voice and text applications. In addition to basic email systems, Comper IT can customize and integrate the following applications with your networked infrastructure:

- Fax servers/gateways
- Managed Voice-over-IP
- Instant messaging (IM)
- Collaboration Tools such as Microsoft Groove
- Customer Relationship Management (CRM)
- Document Management using Microsoft Sharepoint

Comper IT guarantees that your email system is not only scalable and reliable, but also secure.
